The first and maybe the only school camp he'll ever go on

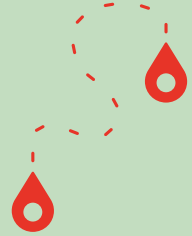

**NOAH + FRIENDS' FIRST EVER FERRY RIDE**

\* Name changed to protect privacy

Noah\* is seven and lives in a small community 40 kilometres from the nearest town. He also lives with a degenerative disorder. Already, his body doesn't do what he wants it to do, and soon he will lose the ability to walk. His school has only six other children, many of whom also have disabilities or learning difficulties. Their opportunities to see a world beyond their town were limited... until now.

# until you helped give them the adventure of a lifetime

Thanks to kind people like you, our Bush Chaplain could help contribute funds for the seven children of this tiny school to go on a school camp at an ecologically and culturally significant site.

The learning that took place on this camp is not something that you could simulate in the classroom. It was all a hands-on experience.

Most of our kids had never been on a plane. They'd never been on a boat. So, that was a huge start!

They saw native wildlife and whales, they connected to country, and they learned about First Nations' history.

- Renae

We really wanted to give Noah, his family, and his classmates, the lifelong memories to be able to say, 'I went on that school camp with my friends.'

Making memories like this will last a lifetime!

Our Bush Chaplain was this angel willing to help our little community and our school in any way they possibly can without being intrusive.

They really have made a huge difference to the lives of the kids in our school.

-School Principal Renae
